## Discover Snorkeling & PADI Skin Diver

What is snorkeling? Snorkeling is using a mask and snorkel to breathe comfortably while looking underwater from the surface. Snorkelers may also use fins, buoyancy vests, and exposure suits, although this equipment may not be necessary depending on the environment. Snorkelers generally stay on the surface, although they may perform occasional dives to get a better look at something below.

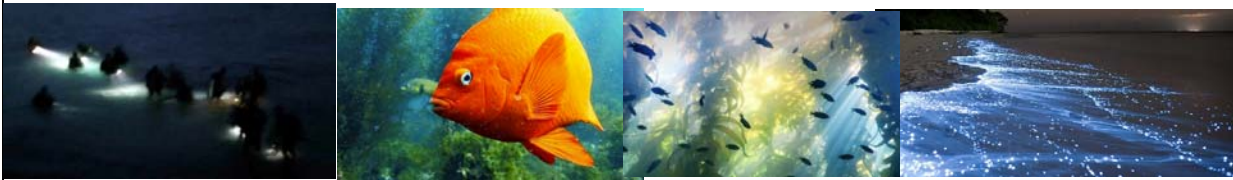

Skin divers use masks, snorkels, fins and buoyancy vests to both snorkel on the surface and make breath-hold dives. Skin divers are proficient at properly adjusting their equipment and buoyancy, equalizing air spaces while diving and clearing their snorkels of water. Skin divers generally venture further than snorkelers and may make frequent surface dives. The PADI Skin Diver course is structured and has specific performance requirements. Skin Diver students must demonstrate proficiency in surface dives, equalization and ascent techniques.

Discover Snorkeling, on the other hand, is an experience, not a course. It's a supervised snorkeling tour. Snorkelers can return to you many times to participate in different Discover Snorkeling tours. You will be introduced to surface dives and equalization can be part of the tips given by our Discover Snorkeling tour leader, however, this is done only if the snorkeler wants to learn these skills.

The goal of this course is to guide you on snorkel tour and show you techniques to snorkel and skin dive effectively. We will also point out underwater marine life to check out.

**Upgrade to Night Snorkel Adventure:** see what comes out at Night! Enjoy the bioluminescence or catch a glimpse of octopuses and lobster as your Pro guides you from shore (Pre-requisite: prior day time program snorkeling or PADI skin diver or BSA Snorkel program.)
